**MATH ONE  
THE GENUS SMART WAY  
WARPED SPEED MATH MASTERY  
MONDAYS & THURSDAYS  
1600 TO 1800**

Math will never be the same again. No frustration. No phobia. There is a wise way of doing Math with “smartcuts” to get the Math Smarts on your Math Path. We individually work with the student to achieve their individual best. This is an individualized worksheet half hour twice weekly. One “Mine” Explore “More” Exercise is given out on Thursdays and taken in on Mondays. If either of these are holidays, we give out or take in the next visit. Each worksheet is designed and produced by iCUBE. We therefore are eager to take your input to suit your child or children’s needs. We cannot guarantee more than a fourth to a third overlap with the schools, however, we cover the entire Math from Counting to Calculus well ahead of the grade level in time. This is a year round program thru Tenth!

**ENGLISH ONE  
THE FLUENT LUCID WAY  
FLUID LUBED ENGLISH EXPERTISE  
MONDAYS & THURSDAYS  
1600 TO 1800**

English will never be the same again. No frustration. No phobia. English is a river of expression and we cultivate the river to take its own course in an ocean. We individually work with the student to achieve their individual best. This is an individualized worksheet half hour twice weekly. One “Mine” Explore “More” Exercise is given out on Thursdays and taken in on Mondays. If either of these are holidays, we give out or take in the next visit. Each worksheet is designed and produced by iCUBE. We therefore are eager to take your input to suit your child or children’s needs. We cannot guarantee more than a fourth to a third overlap with the schools, however, we cover English Alphabet, Reading, Speaking, Writing, well ahead of the grade level in time. This is a year round program thru Tenth!

**MATH ONE  
ENGLISH ONE  
“MINE” XPLORE “MORE” XERCISES  
MONDAYS IN & THURSDAYS OUT  
REQUIRED**

As the pupils take a liking to the subjects, we verify that they are motivated to continue some of the work at home. With this purpose in mind, we send some work home, which is an extension of the work done here. This is our way of finding out how comfortable they are with the techniques, tips, tools, tricks they learnt during their session here. If you love something, you ask for more and mine the content that way. Also, “if you love something, set it free; if it is yours, it will come back” applies here in terms of “retention and recall” via myriads of real life applications. We encourage parents or guardians to not help, just hint if necessary, and certainly not spoonfeed. They are not graded on the timely completion, just graded for correctness, and given every opportunity to correct.

## MATH CLASSIC TOYS PUZZLES SATURDAYS 1000 TO 1050

We will use the tablet to do the brain teaser puzzles quizzes games activities. These will stimulate the mind to investigate Math Mystery at their age specific level. There is a rich collection of these applications that unravel the mathematical concepts, axiomatic truth and more. Some activities are timed, and some are scored, and some are timed and scored.

The kids will be in competition with themselves.

Chess, Checkers, or Monopoly each teaches Math or logic in its tested way. So do these myriads of activities that infuse their own character and spirit in the kids. Motivation is exponential and likewise the problem solving ability.

Kids will build their own rapport with this self investigative methodology and will be on the top notch and find Math very relaxing. This paves the way to expand their Math skill.

This will augment a new era in their Math wisdom, usher in the confidence, and even assume a leadership role like helping others with their Math to consolidate their knowledge.

Each time they will bring home a vast repertoire of Math tricks, tips, techniques.

This compliments with the other Math they may be doing, wherever!

In prospects and retrospects this will ingrain the necessary Math as a hobby, problem solving as a habit, and add the Math tool in their hats that will be versatile, enduring and available for recall in every stage of their lives. **Limit 24 pupils.**

## **ENGLISH CLASSIC TALES PROSE POETRY SATURDAYS 1100 TO 1150**

We will introduce this tablet loud passage reading, listening by each participant in turn. We will study the story's events, characters, and place ourselves in those time periods.

This will help in reading comprehension, listening comprehension, kindle imagination as the participants cross times and geographies along with the storyline and therein humble, hardworking, intelligent, adaptive characters. Some titles are the Summer Reading ones!

Sampling of the stories is attached; these are by no means laid in concrete. There are other authors, and other epics that construct in the kids mind beautiful images, like the Sindbad and His Seven Sea Voyages. Only age appropriate content will be read, listened, and discussed. We have started with the Gulliver's Travels. Next story shall be the classic Arabian Nights! **Limit 24 Pupils.**

***Aesop's Fables***

***Arabian Nights***

***Grimms' Fairy***

***Amar Chitra Katha***

***Birbal***

***Chanakya***

***Kautilya***

***Panchatantra***

... I do not confine the application, which I recommend, singly to the view and emulation of excelling others (though that is a very sensible pleasure, and a very warrantable pride); but I mean likewise to excel in the thing itself; for, in my mind one may as well not know a thing at all, as know it but imperfectly. To know a little of anything gives neither satisfaction nor credit; but often brings disgrace or ridicule. Mr Pope says, very truly,

A little knowledge is a dangerous thing;  
 Drink deep or taste not the Castalian spring.

And what is called a smattering of everything infallibly constitutes a coxcomb. I have often, of late, reflected what an unhappy man I must now have been, if I had not acquired in my youth some fund and taste of learning. What could I have done myself, at this age, without them? I must, as many ignorant people do, have destroyed my health and faculties by sotting away the evenings; or, wasted them frivolously in the tattle of women's company, must have exposed myself to the ridicule and contempt of those very women; or, lastly, I must have hanged myself, as a man once did for weariness of putting on and pulling of his shoes and stockings everyday.  
 ...

● Lord Chesterfield's Letters' To His Son

— Wisdom that does not wear by The Ages and The Eons!

Black Beauty	Anna Sewell
The Tenant of Wildfell Hall	Anne Brontë
The Casebook of Sherlock Holmes	Arthur Conan Doyle
Adventures of Sherlock Holmes	Arthur Conan Doyle
The Adventures of Pinocchio	Carlo Collodi
David Copperfield	Charles Dickens
Great Expectations	Charles Dickens
The Pickwick Papers	Charles Dickens
A Tale of Two Cities	Charles Dickens
Hard Times	Charles Dickens
Oliver Twist	Charles Dickens
Robinson Crusoe	Daniel Defoe
Tales of Mystery and Imagination	Edgar Allan Poe
The Secret Garden	Frances Hodgson Burnett
The Phantom Of The Opera	Gaston Leroux
Uncle Tom's Cabin	Harriet Beecher Stowe
Moby Dick	Herman Melville
Last of the Mohicans	James Fenimore Cooper
Pride and Prejudice	Jane Austen
Sense and Sensibility	Jane Austen
Pilgrim's Progress	John Bunyan
<b>Gulliver's Travels</b>	<b>Jonathan Swift</b>
Around the World in Eighty Days	Jules Verne
Alice's Adventures in Wonderland	Lewis Carroll
Through The Looking Glass	Lewis Carroll
Adventures of Huckleberry Finn	Mark Twain
Adventures of Tom Sawyer	Mark Twain
The Importance of Being Earnest	Oscar Wilde
Kidnapped	Robert Louis Stevenson
Treasure Island	Robert Louis Stevenson
The Strange Case of Dr Jekyll and Mr Hyde	Robert Louis Stevenson
Much Ado About Nothing	William Shakespeare
Julius Caesar	William Shakespeare
The Comedy of Errors	William Shakespeare
The Merchant of Venice	William Shakespeare
A Midsummer Night's Dream	William Shakespeare
All's Well That Ends Well	William Shakespeare

### Fables Characteristics

Animated Narration Keeps The Curiosity  
Talking Animals Get Attention Instantly  
Two – Three Characters  
Teaches A Moral Lesson  
Usually Short And To The Point

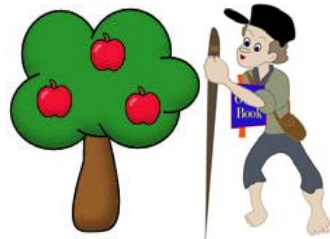

### Fairies Characteristics

Make Believe As In Virtual Reality  
Happens Long Ago And Soars Imagination  
Has Magical Elements  
Happily Ever After Endings  
Evil Person Loses Evil Powers

### Folksies

A folksy is a story that has been told for a long time by a group of people and transcends generational divide.

### Legends

A legend is a story that combines a real event or real person's unusual life sequel with the contrast, the exaggeration, the juxtaposition, and their heroic actions that come to bear down subsequently as legendary.

### Myths

A myth is a story that gives reason for events. Some myths explain natural events such as rainbows or seasons and others explain how the world began. Myths about people and gods explain why people do things. They all provide lessons about good and bad behavior. They may resolve a conflict between do's and don'ts and waywardness.

### Abride, Adapt, Advance, Advent, And Append Of The Internet Sources.

We will mix and match from what is best for the age and audience. The impressions that these stories make on the tender, teeming, thoughtful, pregnant mind are long lasting and help the kids go places and bring home a treasure trove of relevant knowledge for the day!

## **SCIENCE FUN TEST PROJECT SATURDAYS 1200 TO 1250**

**SCIENCE ACTIVITY TEACHES USEABLE RATIONAL NOTIONS**

We will turn this time into a hands—on minds—on science museum, lab, and investigate nature in a safe, curious way. We may reconstruct experiments or view a historical documentary, or an animation of a phenomenon as we build upon the previous pursuits in this time–window.

The kids will take home some projects some days, and for the others, they will study a demo here. The how and why of the things and their working mechanism will be studied.

Any perceived magical outcomes will be analyzed and synthesized to a certain detail.

Simple hobbies like kite flying teach more physics than a class full of lectures, props, gizmos, demos. This is the idea behind the SATURN.

When it comes to the investigation of our surroundings, what if this were that is a huge part of the process and methods. We can truly reconstruct some scientific experiments and gain the same insight the original investigators revealed to us.

Kids will be encouraged to devise an experiment, or make a fair type presentation. If a fair is upcoming in their schools or communities, we will gladly churn out some conceptual presentation that will be novel and noteworthy. We will let the kids connect the dots! Let it become their second nature to think! **Limit 24 pupils.**
